CONTENTS

FLUID MECHANICS IN THE FIRST HALF OF THIS CENTURY, *Sydney Goldstein* 1

BUOYANT PLUMES AND THERMALS, *J. S. Turner* 29

LAMINAR SEPARATION, *S. N. Brown and K. Stewartson* 45

STRATIFIED FLOWS, *Chia-Shun Yih* 73

ELECTROHYDRODYNAMICS: A REVIEW OF THE ROLE OF INTERFACIAL SHEAR STRESSES, *J. R. Melcher and G. I. Taylor* 111

THE FORMATION OF SEDIMENT RIPPLES, DUNES, AND ANTIDUNES, *John F. Kennedy* 147

BOUNDARY-LAYER TRANSITION, *Itiro Tani* 169

HYDRODYNAMIC NOISE, *J. E. Ffowcs Williams* 197

BLOOD FLOW, *Robert T. Jones* 223

SHEAR-FLOW TURBULENCE, *O. M. Phillips* 245

HIGHER-ORDER BOUNDARY-LAYER THEORY, *Milton Van Dyke* 265

SURFACE-TENSION-DRIVEN PHENOMENA, *V. G. Levich and V. S. Krylov* 293

THE TRANSITION FROM CONTINUUM TO MOLECULAR FLOW, *Frederick S. Sherman* 317

THE AERODYNAMICS OF TURBO-MACHINERY, *W. R. Hawthorne and R. A. Novak* 341

DRAG REDUCTION BY ADDITIVES, *J. L. Lumley* 367

SHOCK WAVES AND RADIATION, *Ya. B. Zel'dovich and Yu. P. Raizer* . . 385

HYDROMECHANICS OF AQUATIC ANIMAL PROPULSION, *M. J. Lighthill* 413

SUBJECT INDEX

A

Acceleration pressure in blood flow, 229
Acoustic-source terms in wave equation, 202
Aeolian bed configuration, 148
Aerodynamic sound
  aerodynamic sources near noncompact surfaces, 213
  generated by a turbulent liquid-bubble mixture, 217
  induced by finite regions of free turbulence, 207
    one-dimensional, 210
    two-dimensional, 208
    three-dimensional, 207
  moving aerodynamic sources at high speeds, 217
  near Mach number to one, 218
  radiated from compact aerodynamic surfaces, 211
  wave equation, 200
    exact solutions, 207, 209, 210
    isotropic quadrupoles, 203
    term arising from mass ejection from cavities, 205
Agglomeration of polymer solutions, 371
Airfoil theory (historical), 14
Amplification of disturbances in boundary layer, 170
Anal fins, 419
Anguilliform aquatic propulsion, 421-24
Anisotropy factor of energy-containing eddies, 258
Antidunes
  description of formation, 148
  see also Bed forms
Aorta
  capacitance of, 240
  compliance of, 240
  see also Elastic vessels, Blood pressure drop, Blood flow
Aquatic animals
  table of phyla and classes referred to, 415
  see also Pisces
Aquatic propulsion
  in armoured fishes, 439
  ciliary propulsion, 414
  efficiency, 433
  limbs in swimming, 440
  in mammals, 443
  in reptiles, 441
  serpentine mode of propulsion as an aquatic one, 441
  thrust coefficient, 433
  undulatory propulsion, 415-16
    see also Undulatory aquatic propulsion
Attachment point in boundary layers, 53

B

Barchan dunes, 149
Barriers
  of arbitrary height, 98
  flow over and lee waves, 96
Bed forms
  aeolian or wind-generated, 148
  critical flow
    formations of antidunes, 164
    transition, 164
  definition, 147
  dominant wave length of, 155
  effect of water-temperature changes, 166
  fully developed, 162
  mechanism of formation, 149
  models of analytical treatments, 151
  occurrence and characteristics, 147
  spectral-density function, 150
  stability, 152
  transition regime of Froude number, 159
Bernoulli pressure in blood flow, 229
Beta-effect, 89
Bingham fluid, 224
Bjerknes' theorem, 79
Blockage coefficient in aerodynamics of turbo-machinery, 341
Blocking
  definition, 98
  description of phenomenon, 99
  in stratified fluid, 99
Blood-pressure drop
  acceleration pressure, 229
  aortic pressure pulse, 235
  in arterioles, 224
  Bernoulli pressure, 229
  complex impedance, 342
  diffusion of pressure, 234
  in heart and aorta, 225-26
  lumped peripheral resistance, 230
  peripheral impedance, 232
